SEEMOY SHOME

Frontend React Developer | Next.js | TypeScript | Node.js | MySQL

Bengaluru, Karnataka 560017 · seemoys@gmail.com · +91-9525953344 · github.com/seemoys · l https://www.linkedin.com/in/seemoy-shome-016613243/

PROFESSIONAL SUMMARY

Frontend React Developer with 2+ years of experience delivering high-performance, client-ready web applications across the full Software Development Life Cycle (SDLC). Proficient in React.js, Next.js, TypeScript, Redux Toolkit, Node.js (Express), and MySQL — with measurable impact: Lighthouse scores lifted from 55 to 80+, API latency cut by 30%, and a 30+ component library that accelerated sprint delivery by 35%. Operates effectively in agile squads, translating business requirements directly into scalable frontend solutions with zero hand-holding. Brings a background in client-facing operations that sharpens both communication precision and user-first thinking — an edge most pure-tech candidates do not carry into enterprise delivery roles.

CORE SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP
Frontend	React.js, Next.js (App Router), Redux Toolkit, Zustand, Context API, Tailwind CSS, CSS Modules, Bootstrap
Backend / DB	Node.js (Express), MySQL, REST API Integration, Asynchronous Data Handling, PHP
SDLC & Delivery	Agile/Scrum, Full SDLC (Design → Dev → Test → Deploy), Code Reviews, Technical Documentation
Tooling	Git, GitHub, Webpack, Vite, npm, Jest (Unit Testing), Postman, VS Code
Soft Skills	Client Communication, Cross-functional Collaboration, Continuous Learning, Mentoring
Exploring	Next.js SSR/SSG, GitHub Actions CI/CD, Docker, AWS (S3, EC2)

PROFESSIONAL EXPERIENCE

Frontend / React Developer (Node.js · MySQL · TypeScript)

Aug 2023 – Present

Silicon India Pvt. Ltd. — Bengaluru (Internal Portals & B2B Products, ~50-person engineering org)

- Designed and developed **5+ responsive, scalable React.js SPAs** serving **500+ daily users** across multiple internal business portals, collaborating in a **7-person agile squad** with product managers, designers, and backend engineers to ship features on schedule.
- Translated UI/UX designs into a **30+ component reusable library**, cutting new-feature development time by **35%** — measured by comparing sprint velocity before and after adoption across 3 sprint cycles.
- Progressively migrated the existing JavaScript codebase to **TypeScript**, eliminating a measurable class of runtime type errors and reducing bug-related PR comments during weekly code reviews.
- Optimized React applications for speed and performance using **memoization (React.memo, useMemo, useCallback) and code splitting (React.lazy + Suspense)**, improving Lighthouse performance scores from **~55 to 80+** across key portal pages.
- Integrated frontend applications with **20+ RESTful API endpoints** handling asynchronous data fetching, error states, and response caching — reducing average API round-trip latency by a measured **30%**.
- Implemented state management using **Redux Toolkit** for complex global state and **Zustand** for lightweight feature-level state (e.g. cart, filters) — choosing Zustand where less boilerplate improved maintainability without sacrificing performance.
- Built **mobile-responsive interfaces** tested on real devices targeting breakpoints below **768px**, ensuring cross-browser compatibility across Chrome, Firefox, Safari, and Edge using Tailwind CSS and CSS Modules.
- Developed **20+ Node.js (Express) and PHP REST APIs** backed by MySQL tables ranging from **1,000 to 100,000 records** — including paginated endpoints, role-based filtering, and transactional cart and order handling.
- Wrote **10+ Jest unit tests** for critical action handlers, conducted **weekly code reviews** maintaining team coding standards, and onboarded one junior developer through structured walkthroughs and documentation.

KEY PROJECTS

E-Commerce Product Module React · TypeScript · Node.js (Express) · MySQL · REST APIs · Tailwind CSS

- Built scalable, responsive product listing, detail, and cart pages for an internal e-commerce platform serving ~500 daily active users.
- Integrated 10+ RESTful Node.js APIs handling asynchronous data fetching, keyword search, category filtering, and transactional cart/order handling backed by a MySQL schema designed from scratch.

Sales & Operations Dashboard React · TypeScript · Node.js · MySQL · Chart.js · Redux Toolkit

- Delivered a real-time dashboard tracking daily sales, order counts, and revenue — translating product manager wireframes into reusable React components with Redux Toolkit state management.
- Built dynamic sortable/filterable data tables handling 10k+ row datasets; collaborated with backend engineers on MySQL query optimisation, reducing dashboard load time by ~30%.

Personal Portfolio — Next.js (In Progress) Next.js · App Router · TypeScript · Tailwind CSS · CSS Modules

- Architected using Next.js App Router implementing SSR for dynamic content and SSG for static pages — applying server components, file-based routing, and CSS Modules; deployed on Vercel with GitHub Actions CI/CD.

Internal Action & Reporting Module React · Node.js · MySQL · Role-Based Access · Jest

- Developed role-based reporting pages (Admin / Manager / Viewer) with approve/reject/resolve actions, audit-log storage in MySQL, and 10+ Jest unit tests covering critical action handlers.

EARLIER EXPERIENCE (Pre-Tech Career)

Before transitioning into software development in 2023, built 5 years of professional experience in process operations and BPO environments — developing strong skills in structured problem-solving, client communication, SLA adherence, and data accuracy that continue to inform how I approach software quality and user-facing products.

Process / Operations Executive

2018 – May 2021

BPO / Operations Industry — Kolkata / Bengaluru

- Owned end-to-end process workflows across a high-volume BPO operation, meeting SLA targets across 95%+ of monthly cycles while handling 200+ records daily with zero tolerance for data integrity errors.
- Served as first point of contact for client queries and escalations, resolving issues within defined SLA windows — a discipline that directly informs how I approach bug triage and production incident response.

Health Insurance Agent

May 2021 – Feb 2023

Max Life Insurance — Bengaluru

- Managed the full policy lifecycle for a self-built portfolio of 50+ active clients — from KYC onboarding and documentation to claims guidance — exceeding acquisition targets for 8 consecutive quarters with zero mis-selling complaints.
- Distilled complex policy terms into plain-language explanations for first-time buyers, sharpening a client communication precision that transfers directly to explaining technical decisions to non-technical stakeholders.

EDUCATION

Bachelor of Computer Applications (BCA)

2015 – 2018

JIS College of Engineering, Kolkata

ADDITIONAL

GitHub:	github.com/seemoys — personal projects including Next.js portfolio (in progress)
Currently learning:	Next.js (App Router, SSR/SSG), Docker, GitHub Actions CI/CD, AWS S3/EC2 deployment
Languages:	English (professional), Bengali (native), Hindi (conversational)
Availability:	Open to in-office (Bengaluru), hybrid, or remote opportunities
